

Study Hours Worksheet

Time Investment

In order to give yourself the highest probability of success, you should spend approximately 3 hours of study for each hour of class.

For example, a class that meets, 3 times a week requires an additional 9 hours of outside studying (assignments/homework) per week. Therefore, a student carrying 17 credit hours should plan to spend approximately 45 hours each week studying beyond the classroom. With a web class, it is calculated the same way, a 3-credit class requires an additional 3 hours of outside work per credit.

If you tally study time and class time, a typical student invests from 45 to 60 hours in academic work each week. Add a social life. And part-time job and you can see that time management will be critical to success.

Budgeting your time in college is as critical investment that starts paying off with your success!

Example Worksheet	Hours in Class	Study Hours	Total Hours
Class 1 - English	3	9	12
Class 2 - Economics	3	9	12
Class 3 - Calculus	3	9	12
Class 4 - Computer Science	3	9	12
Class 5 - Physics	3	9	12
Totals	15	45	60
